

Varun Ram Mhatre

Data Analyst | Business Analyst | BI Analyst | Navi-Mumbai, Maharashtra
083692 66891 | varunmhatre2324@ternaengg.ac.in | GitHub: github.com/Varun-200646
LinkedIn: <https://www.linkedin.com/in/varun-mhatre-1a9438338/>

Profile:

B.E. student with strong practical skills in Data Analytics and Advanced Excel. I enjoy working with data, specifically cleaning, organizing, and validating datasets to ensure they are accurate. Through my academic projects, I have built dashboards and trackers using Pivot Tables and VLOOKUP to solve real problems. I am detail-oriented and looking for an internship where I can support the team with daily reporting and data maintenance.

Skills:

Programming: Python (NumPy, Pandas), SQL (Joins, Aggregations)

Business Intelligence: Power BI (DAX, Power Query, Relationship Modeling), Tableau

Data Operations: ETL, Data Cleaning, KPI Development, Data Modeling (Star Schema)

Tools: Excel, Jupyter Notebook

Databases: MySQL

Soft Skills: Analytical Thinking, Problem Solving, Communication, Presentation Skills

Projects:

E-Commerce Sales Dashboard | Personal Project | 2025

 GitHub: github.com/Varun-200646/E-Commerce-Sales-Dashboard

- Built an end-to-end Power BI report analyzing sales, profit, customer segments, and category-wise performance.
- Performed data cleaning and transformation using Power Query, creating a star schema-based data model.
- Implemented KPIs such as Total Sales, Profit Margin, Repeat Customer Rate, and Year-over-Year growth.
- Designed interactive visuals to help identify top-performing regions and products, improving business insight generation.

Transport Delivery Performance Dashboard | Personal Project | 2025

 GitHub: github.com/Varun-200646/Transport-Delivery-Performance

- Created a transport delivery analytics dashboard to track delivery status, on-time performance, delays, and reasons for delay.
- Used DAX to calculate KPIs such as On-Time Delivery %, Average Delay, Route-wise Efficiency, and Shipment Trends.
- Enabled operations teams to identify delay patterns and optimize logistics decision-making.

Education:

B.E. in Artificial Intelligence & Data Science — GPA: 8.31/10

Terna Engineering College, Nerul, Navi-Mumbai

Expected Graduation: June 2027

Relevant Coursework: Database Management, Statistics, Data Visualization.

Certifications:

1. [Python Basic](#)
2. [SQL Basic](#)
3. [SQL Intermediate](#)
4. [Google Data Analytics \(Coursera\)](#)
